I love bringing fun reading materials to my class. I am able to do this easily and affordably through Scholastic Book Clubs. Should prices increase it will be harder for myself, other educators, and families to get great books, games, and materials for learning into children's hands. Teachers and parents are often cautious with how they spend their money and shipping costs are not high on the list of things we want to spend it on, but books are! Please help keep the cost of shipping down!

Thank you,
